Abstract

Public Health

Mangalore municipality - Dorebail Trenching ground - Removal from present site - Orders passed.

- - - -

From the Director of Public Health, Madras, R.No.1233-2-Sany. dated 3rd November 1929.

Derbail Trenching Ground - Mangalore.

Refce. Correspondence ending with this office letter R.No.1536-10-Sany. of 29 dated 5th September 1930.

From the Surgeon General's remarks and the proposals of the Municipal Health Officer and the Agricultural Demonstrator (copies enclosed), it can be seen that the site is extensive enough, to be, and can by proper management, be, maintained as a trenching ground without causing a nuisance.

I therefore recommend that the present trenching ground continue to be used, the Municipal Health Officer and the Agricultural Demonstrator being consulted as to the best method to be adopted to prevent a nuisance.

Copy of letter Ref.on H.C.R.405 dated 30-7-30 from the Municipal Health Officer, Mangalore to the Chairman, Municipal Council, Mangalore.

I have the honour to state that I accompanied the members of the Special Committee appointed to select a site for the Trenching ground. We inspected practically all the available vacant sites within a radius of 7 miles and had to reject every one of them for one reason or other and found that no site was better than the present one.

I am of opinion that till now the trenching operations in the present ground were badly managed. For some unknown reason the trenching was confined to the most low lying lands and that too to about 10 acres, leaving nearly 40 acres or so out of account. This resulted in the land getting sewage-sick and process of notification seriously interfered with.

Since I commenced to trench in the high land there has been no suisance. This was endorsed to by the Surgeon-General and Mr. J.A. Saldana, M.L.C., when they recently visited the place.

If the whole land is properly terraced, the surface water could be impounded and not allowed to wash away the filth in the valley as at present and thus a nuisance now complained of removed.

Furtner if the high land now lying waste is converted into a cocoanut and mango garden and the low land into a grass farm and the trenching done in between the cocoanut and mango groves the nuisance will practically subside and also yield a good return to the municipality.

The Agricultural Demonstrator who visited the place assures me that the land is an ideal one and we could easily get 12% per annum on the outlay.

For converting this into an experimental farm, a fencing is urgently required and steps may be taken to wall in the whole land with mud walls and this season is the best time for it.

If we are short of funds we can apply to Government for an agricultural loan and carry on the work.

Year after year attempts have been made to sell the manure and there have been no buyers and hence it is up to us to set an example and show to the public what wealth there lies in the trenching ground.

To conclude, I am of opinion that the present site is the best under the circumstance and with a view to abate the unavoidable nuisance and to make the concern a remunerative one, immediate steps be taken to convert this into a farm.

Copy of letter Ref.No.1273-1-H.30 dated. 21st July 1930 from the Surgeon General, Madras to the Director of Public Health, Madras.

I enclose for your perusal, remarks and return the enclosed letter dated the 8th July 1930 from Mr.Henry Cunha regarding the shifting of the trenching ground in the Mangalore Municipality. During my recent visit to Mangalore. I saw this trenching ground with the Municipal Health Officer, Mangalore. The Municipality have now left the Nullah apparently and are trenching on the hill, and since the whole area is 53 acres, I could see no objection to the present ground.
